## Install PluginJS?

Hi:

I've seen here:

<http://doc.tikiwiki.org/tiki-index.php?page=PluginJS>

that documentation is intended to show the effects of that plugin. However, the plugin is not installed (nor [Mods](#) feature enabled at doc.tw.o).

Should this plugin be installed in doc.tw.o?

Should [Mods](#) be used in doc.tw.o?

Hmm, I think we'll have to if we want to show the effects. Other comments?

Not totally necessary. I've updated the page, showing the effect of the plugin. Or, feel free to rollback...
