Parameter

    pagedescription

Command

    display (inline)

Description

    pagedescription="y" will set the page's meta description tag to the contents of the field for the first item found in the results with pagedescription set if the metatag_pagedesc preference is enabled.

    Note: For both pagedescription and pagetitle no filtering is performed on the content, so use plain text only and avoid non-alphanumeric characters.

Version

    9.x
